**BULLY DOG TECHNOLOGIES RELEASES THE PERFORMANCE MANAGEMENT TOOL**

The Performance Management Tool (PMT) combines the performance and adjustability of a downloader with the safety and reliability of a module. The PMT is loaded with 4 pre-set performance settings adding as much as 230 additional horsepower. Beyond the added performance the PMT mounts in the cab where it serves as a monitoring gauge allowing the driver to monitor the vehicles performance and operating conditions as well as the ability to scan diagnostic Trouble Codes.

**SUPERLIFT 2.5" AND 6" LIFTS FOR 2007 CHEVY/GMC 4WD AND 2WD PICKUPS AND SUVs**

Superlift has two suspension systems for 2007 GM pickups and SUVs (C/K1500, Tahoe/Yukon, Suburban/Yukon XL and Avalanche). A 2.5" leveling kit clears larger tires. Superlift's 6" system was modeled using advanced computer-design software. Driveability and durability are prioritized with proper coil spring rates and shock dampening, suspension travel control, steering geometry and CV-axle operating angles. Pickup rear lift options are 5" blocks or Superlide replacement springs; SUVs utilize new coil springs plus all necessary bracketry for proper 4-link function.
