

WHAT'S NEW?

FAST™ AIR/FUEL METER RPM MODULE

Knowing your engine's air/fuel ratio is critical to maximizing its performance. Knowing what rpm that air/fuel ratio is occurring at gives you the data you need to make precision adjustments to address specific tuning problems. The FAST™ Air/ Fuel Meter RPM Module is an upgrade kit that lets you monitor and record your engine's rpm and is fully compatible with any FAST™ Air/Fuel Meter. It installs with a quick firmware update to your meter, and the rpm module plugs in-line with your existing O2 sensor harness. The rpm pick-up is a unique inductive pick-up design that eliminates any wire cutting to get your rpm signal. *A Competition Cams company.*

NEW PRODUCTS

With new innovative features and products, **Truck Covers USA** sets itself apart from the competition. We are not in business to produce truck covers that *represent the industry standard*, we are in business to *become the industry standard*. After seeing the number of requests rapidly growing for the American Roll Cover to be modified to fit a particular truck bed along with an existing tool box and realizing this niche in the market - research and development began. Two much needed products were now combined for the ideal work truck combination. The American Work Cover is awesome looking with the same unsurpassable quality Truck Covers USA prides itself on. Security, style and simplicity is a must have cover for any work truck! Hot sellers: Covers for the new Toyota Tundra models.
