PWA University: Tell Us About It

I am really excited about the PWA University courses being offered to us through P&E. The day after taking the Throttle body spacer course, I was able to recommend them to a customer at one of our wholesale accounts. It turned out to be exactly what the customer was looking for and we were able to write the order and deliver them same day. If I had not taken the class the night before, we would not have closed the sale. The customer was not aware of there function and availability. I look forward to taking more classes and sharing the product knowledge with our customers.
