2009 will be 9/12 - 9/16	2013 will be 9/21 - 9/25
2010 will be 9/25 - 9/29	2014 will be 9/13 - 9/17
2011 will be 9/17 - 9/21	2015 will be 9/26 - 9/30

ODDS & ENDS

Mr. Gasket announces additional applications for the new **ThermoCap**, a specially designed radiator cap engineered to prevent injuries by displaying coolant temperatures. Hot coolant can cause severe injuries. Mr. Gasket's new ThermoCap has a built-in thermometer that displays coolant temperatures, providing a quick reference to help prevent such injuries. Using the temperature gauge, it can easily be determined if it is safe to remove the cap without having to depend on inaccurate factory gauges or expensive aftermarket thermometers.

How to Build Chevy Small-Block Circle-Track Racing Engines from **CarTech** is chock full of tips and tricks that will have your engine making more power-reliably-than the competition. Tapping into the knowledge and expertise of some of racing's top engine builders, author Jeff Huneycutt delivers the information you need to put your engine at the front of the field. The book starts by helping you determine the unique needs of your car and track. Then it proceeds to cover every aspect of building a high-horsepower race engine, ending with advice for tuning and maintenance. It covers parts selection, block prep, short-block assembly, advice on how to get the best results from your machine work, port work, camshaft and valvetrain parts and prep, oiling system recommendations, final assembly and more.

FaceSetter Performance Products, designers and manufacturers of quality, affordably priced headers and performance exhaust systems for 35 years, announces the availability of its **TFX Performance Exhaust System for the 2005-06 Pontiac GTO**. (It can be made to fit the 2004 GTO with a rear body valance change.) Manufactured with 16-gauge, corrosion resistant aluminized steel, the system contains dual 2-1/2" intermediate and under axle pipes and a pair of fully welded POWER Mufflers each ending in a polished and chrome plated stainless steel tip that will never corrode. Everything bolts to the stock or stock replacement catalytic converters, making the system 50-states legal. The dual intermediate pipe assembly is fitted with a balance tube and is as close to a "true dual" system as you can get.

Seven different **FAST™ Dual-Sync Distributors** available for popular engine applications utilizing XFI™ Fuel Injection. By offering easy, drop-in installation and precise timing, the distributors are the most "user friendly" distributors you can buy for high performance street engines utilizing the FAST XFI™ Fuel Injection System. Equipped with dual, discreet signal pickups, they provide fully sequential EFI operation and the billet 6061-T6 CNC-machined housing ensures long life. Fully tested and specially engineered to work in conjunction with XFI™, these distributors offer the ultimate in timing performance for your engine. *Fast is a division of comp Cams.*
