Superchips

Introducing Mileage XS Only From Superchips

Are your customers tired of the gas pump sucking the energy out of their wallet? Then you need to sell the Mileage XS fuel economy programmer loaded with the newest engine calibration technology available from Superchips. Your customers will appreciate the scientifically validated money saving gains in MPG and, where possible, calibrations allowing 91 Octane required vehicles to run safely on 87 Octane*. Carry Mileage XS today and deliver savings that will make your customers cool from the heat.

*Mileage XS contains economy specific calibrations that may be available in other Superchips products. Superchips® continually works to improve economy calibrations and recommends Mileage XS owners update their product regularly to have the latest calibrations and features. Superchips® claims are based on a modified SAE fuel economy test. Actual improvements vary with driving conditions. See Superchips.com for more information.
