### Fuel Injected Corvettes 1957-1965

This is a great book, rich in history with outstanding photos. A must read for your die-hard fuelie customers. "Fuelies" were iconic cars of the early muscle car era, much in the same way that Hemis or Shelbys become one word icons. The first Corvette book to focus specifically on the fuel injected cars, which are among the most collectible Corvettes ever built. Corvettes manufactured between 1957 and 1965, equipped with fuel injection systems atop their small block engines are given special respect by enthusiasts. Built by GM's Rochester division, this fuel injected unit turned the docile, small-block engine into a super performance engine with as much visual impact as it had horsepower.
