ACCEL Eliminates Burnt Plug Boots Forever

ACCEL now offers the cure for burnt spark plug wire boots with Extreme 9000 Ceramic Wire kits. The 8mm Ferro-Spiral core wire now has ceramic boots on the spark plug end of the wires that will withstand up to 2,000° F. If you are running headers with close tolerances, an engine bay with little room, or an RV with boots that melt because of heat, these wire kits are the answer for burnt and melting boots. (Accel is a division of Mr. Gasket.) For more information: www.mrgasket.com. 216-688-8300,

- Ceramic spark plug boots cannot be burned – even if the headers glow red
- Spiral wound wire core is safe for electronic ignitions
- Improves engine performance, quicker throttle response and reduced emissions
- Perfect for extreme use vehicles like hot rods, race cars, trucks and RV's

aFe Releases Their New Stage 2 Intake for the 2006-08 Honda Civic L4-1.8L

Advanced Flow Engineering Stage 2 air intake system features a one piece heat shield for maximum air control. This system also includes a performance engineered rotomolded plastic housing for maximum air control and performance. 54-11432 includes the Pro 5R performance air filter, which utilizes 5-layers of progressive cotton media for maximum flow and performance. 51-11432 includes the new Pro Dry S filter, which utilizes 2-layers of progressive synthetic media that requires no recharging oils for maximum convenience. For more information: www.afefilters.com. 951-493-7100.

08-09 Dodge Ram 4.7L V-8 PowerAid® Throttle Body Spacer from Airaid

AIRAID® Filter Company announces the release of an all-new PowerAid® Throttle Body Spacer for the 08-09 Dodge Ram. The new PowerAid features the patented Helix-Bore design which creates a highly-active air charge through the throttle body for better atomization of the air/fuel mixture all the way to the combustion chamber. The end result is dramatically improved part-throttle torque, increased mid-range power, and overall fuel efficiency. For more information contact AIRAID at (800) 498-6951. www.airaid.com

Maximize Your Fuel Flow from BD Diesel

BD's new Flow-MaX lift pump has been designed to deliver ample fuel flow for more than 600 horsepower, yet is more compact, quieter and durable than competitive products. Featuring a hard anodized aluminum body and proven gerotor design, the Flow-MaX flows 150 gallons per hour (GPH) at 10 psi, and up to 165 GPH at full flow. It's the ideal replacement for the OEM pump, which can fail even at the stock horsepower level and cause damage to the injection pump. The Flow-MaX mounts to the frame using vibration isolators, and the kit includes all necessary hoses and mounting hardware. BD Diesel Performance, (800) 887 5030; www.dieselperformance.com
