

Catalogs for 2009

COMP Cams® Ultra Pro Magnum™ Rocker Arms

The original Pro Magnum stud mount rocker arm design has been the standard of the industry for almost 20 years, but recent advancements in design capabilities and steel casting processes have paved the way for a "clean sheet" redesign. Utilizing years of valve train design experience, the latest FEA stress analysis technology and an exhaustive testing regiment (dyno & Spintron®), the COMP Cams engineering team left no detail to chance. Everything from casting techniques to valve spring clearance was scrutinized to ensure that the new Ultra Pro Magnum Rocker Arms not only live up to the lofty standards of their predecessor but also took stud mount rocker performance, stability and value to a whole new level. Consider the mission accomplished.

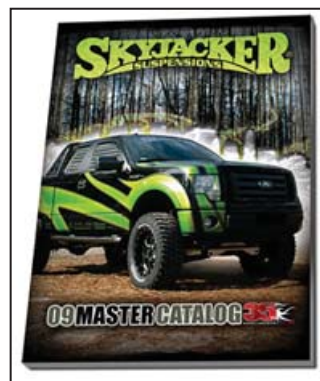

Diesel Performance Catalog from Ansa

Silverline™ Stainless Steel Exhaust products include direct-fit single and dual systems for current year model light diesel trucks, universal stack kit components and an expanded selection of gas and diesel truck tips and accessories. New Chrome-Over-Stainless truck tips have been added to the already comprehensive tip line, as well as new designs in Black Stainless and high-polished T304 Stainless Steel. www.SilverlineExhaust.com
