INDUSTRY NEWS

Thermo-Tec Automotive Products Posts Three Lessons on the PWA University Website

Jim Henderson, the Director of Sales and Marketing for Thermo-Tec Automotive Products, Inc., has announced the posting of three training lessons on the Performance Warehouse Association's PWA University website. Thermo-Tec becomes the 33rd manufacturer to participate in the training program. The lessons focus upon the three key product classifications of the Thermo-Tec line: Thermo-Tec Header Wrap and the related products, Thermal control products and Acoustic control products. Each lesson focuses on product features, benefits, applications and the related "add-on" sales.

Quarter Master® Industries Inc. Joins COMP Performance Group™ Family

CPG welcomes innovative driveline company known for state-of-the-art racing clutches and driveline components for performance and racing applications. The COMP Performance Group™ announces the addition of Quarter Master® Industries Inc. to their family of high performance companies. Quarter Master® has enjoyed a long history of track-proven, race-winning results through their attention to detail, extensive field-testing and awareness of racer needs. Designed using the latest Auto CAD, 3D modeling and FEA technology, their clutch and ancillary products are built by an experienced staff at their modern facility in Lake Zurich, IL, a suburb of Chicago. www.compcams.com

Percy's High Performance Hires Rollins Performance Marketing

Jeff Percival, President of Percy's High Performance, and Rick Rollins today jointly announced Rollins has accepted the position of Director of Marketing & Sales for Percy's. Rollins will oversee all marketing and sales efforts of Percy's as the company expands their product line, and availability throughout the automotive aftermarket distribution network and racing arenas. "I am very excited about the opportunity and challenges of working with Jeff and his company," said Rollins.

Stage 8 Has New Facility

Stage 8 Locking Fasteners has acquired a new 5000 square foot facility in San Rafael, California. The facility, at 4318 Redwood Highway, will increase production capabilities making the operations much smoother and more efficient. Earlier this year Stage 8 rebuilt and revised the www.stage8.com web site. The layout of the site is patterned after the catalog. Specific applications guide the visitor to easy to find correct part numbers with retail pricing. In addition, the site directs visitors wishing to source Stage 8 products to the PWA - Parlocator for purchasing.
