

2004 Manufacturer of the Year

The Manufacturer of the Year Award is in recognition of Superchip's outstanding contributions to the specialty equipment industry and in appreciation of their conscientious efforts in support of the warehouse distributor of merchandise distribution.

Superchips

Started in England in 1983, Superchips was one of the first companies to exclusively reprogram car computers for more performance. Due to a program of up-loading car computer information by dealers, then sending that information to Superchips' main computer in England, Superchips was able to tune cars through their dealer network in several different countries. In 1992, Superchips opened Superchips, Inc. in the USA in Longwood, Florida and with the vast experience of reprogramming for automakers from all over the world,

they soon had the widest product line in the world. Now with 52 employees located in a brand new, custom built facility in Sanford, Florida, Superchips was recently named by INC 500 magazine as one of the fastest growing 500 companies in the US with a 801% growth rate in the last five years! Superchips - more power for tow and go!
